Subject: Fwd: State access to PFAS Analytic Tools

For awareness. We (OECA and ord) gave a webinar on the tool, before the holidays, to a group of state reps organized by ECOS, so some states are aware but might be worth covering in a future webinar.

Andrew J. R. Gillespie, Ph. D.
Associate Director, NERL

Subject: FW: State access to PFAS Analytic Tools

Yesterday I sent out the instructions for states to access the PFAS Analytic Tools. I wanted to forward this along just for your information.

Subject: State access to PFAS Analytic Tools

In follow up to our meeting a few weeks back, we have turned on access to the PFAS Analytic Tools for the states. The attached PPT has more detailed instructions on how to navigate to the ECHO Gov Data Visualization Gallery where the pages reside (see page 12 of PPT). We are hoping to get feedback on the site from the pilot states by March 8th. Then we will develop necessary changes to brief additional states. I sent Patty some ideas earlier that have areas where we would like feedback.

As we get feedback on the PFAS Analytic Tools, we would also like to begin engaging on another area in the EPA PFAS Action Plan – namely developing a Data Inventory and strategy for data submission/curation. We have put together a draft document that begins to organize the areas where data standards could be useful. Perhaps this document could be the subject of a follow up phone call – and we are also interested in any feedback on the document. As we move forward, we would like to find some states interested in migrating data that can be added to the PFAS Analytic Tools in a way that other states could replicate.

Thanks.
